

Front End Developer

Com Laude - About us

The Com Laude Group is an established and trusted partner to many of the world's most recognisable brands. The business has operated at the heart of the internet since the inception of Com Laude in 2004, and today is regarded as the most trusted provider of the highest quality domain management services to corporates.

This is encapsulated in the Group's mission statement, *"The most trusted provider of domain & registry management services to brand, IT and IP professionals"*.

Headquartered in London, and with offices in Eastbourne, Seattle, Valencia, Edinburgh, Caerphilly and Tokyo, the business is expanding internationally as it continues to develop and grow.

Culture

The Group has a strong culture born out of the depth of expertise of our employees and the considered approach all employees take to the development of the business. We are honest, ethical, trustworthy and professional in everything we do. And most importantly we always place the customer first, constantly striving to maintain our status as the quality leader in our niche industry.

Services and Markets

The business operates at the intersection of Intellectual Property Protection and Information Technology.

It has a well-established Internet Domain portfolio management business, trading as Com Laude. This business is supported by a client management team who are experts in their field and who passionately develop the strongest relationships with our clients.

Our teams use our bespoke domain management platform to efficiently manage internet domain portfolios for our clients located all over the world, as well as associated services. There is an advisory element to the services, which clients highly value. It enables clients to tailor their portfolio to their branding goals and business needs as well as suit their budgets and is complimented by our domain monitoring and dispute resolution services.

The Group also operates a leading new Top-Level Domain consultancy business, trading as Valideus. This business provides strategic consulting, application management services and ongoing support and services to our clients who chose to secure their own internet top-level-domain. This includes the so-called ".brand" domains such as citi or .kpmg. Future rounds of new top-level-domain applications are expected within the next 2-3 years, and with growing awareness amongst potential applicants the prospects for growth are attractive.

Following private equity investment in 2017, the Group is pursuing a growth strategy achieved organically and by entering selected new geographic markets. We are actively trading in the USA and are becoming established in Japan. We have also enhanced our domain name brand protection capability through the acquisition of well-respected Scottish domain name registrar, Demys. We continue to look to extend our services to add additional value our clients, be that in-house or through acquisition.

Front End Developer – Summary

We are open to consider applications from candidates within reasonable commuting distance to any of the following locations (London, Edinburgh & Caerphilly)

Your role

To help the business achieve its goal to be the most trusted provider of domain & registry management services to brand, IT & IP professions by performing a key development role within the ongoing Technology Roadmap.

Duties and Responsibilities

- Form a core part of the Agile team within the development function
- Mainly focused on the Frontend Vue.js codebase but with a requirement to also ultimately provide support for our Laravel backend system
- Play a key role in both setting design guidelines and ensuring that they are adhered to
- Take an active role in all Scrum ceremonies (e.g., Standup, Refinement, Retro and Demos)
- Where required provide assistance in the ongoing design and development of our WordPress based company websites.

Requirements

- The role would suit a candidate with 1-2 years experience in a web design role who is looking to enhance their existing frontend development skillset.
- A web design related qualification is advantageous but not essential.
- An understanding of design principles and how content if creatively presented can assist users is important
- Prior commercial web design experience is highly desirable
- Prior experience of working as part of an Agile team is highly desirable
- Vue.js knowledge is highly desirable
- WordPress knowledge is highly desirable
- Knowledge of JIRA is desirable but not essential
- Knowledge of PHP based systems is desirable but not essential
- Practical experience of working with Linux based systems is highly desirable

Personal Qualities

- Must have a logical and structured approach and good attention to detail
- Ability to work and contribute in a team to deadlines
- Ability to solve problems using previous experience, logic and creativity
- Ability to work independently, unsupervised and under pressure in a fast-moving environment, dealing with staff at all levels in the organisation
- An enthusiastic team player with excellent design skills and a desire to improve their frontend development skills
- Comfortable in a small team with individual responsibilities
- A keen interest in and passion for technology.
- This is the perfect opportunity for someone to develop the skills required to operate at the cutting edge of domain name technology and play a significant part of the growth of the internet
- We are looking for someone who is enthusiastic and motivated to join and shine in a small team supporting our business at the forefront of the internet

To apply for this role please attach **a current CV and cover letter** detailing your suitability for this role and confirming our nearest office location to you and salary expectations.

Due to the volume of applications we receive for roles, we cannot guarantee to provide feedback to unsuccessful applicants.
