

Dear Sir/Madam,

Thanks for adopting .IN/ भारत domain!

Today, the Internet has expanded to include domain names represented in different languages and script. You would be proud to know that India is the only country in the world which has domains known as Internationalized Domain names (IDNs) **in 15 scripts or all 22 official languages.**

NIXI support to make Internet more accessible to India's non-English speaking population and thereby digitally empowering the society.

NIXI desire that your domain should be acceptable by email, all website, all software & mobile applications.

As an end user, if you face any challenge in accessing any software or application with your own domain name then please reach out to the "NIXI UA Helpdesk" on Email - UASupport@nxi.in or Tel. No. **+91 11 48202040**. NIXI's UA helpdesk team will help in resolving the issue as early as possible.

Welcome to the digital world which has no language boundaries.
